

SAMPLE JOB #2

Manufacturing Engineering – Owens Corning

Job Description

Owens Corning (NYSE: OC) is a leading global producer of residential and commercial building materials, glass fiber reinforcements and engineered materials for composite systems. A Fortune 500 company for 53 consecutive years, Owens Corning is committed to driving sustainability through delivering solutions, transforming markets and enhancing lives. Founded in 1938, Owens Corning is a market-leading innovator of glass fiber technology with sales of \$5 billion in 2007 and 19,000 employees in 26 countries on five continents.

This opportunity is critical to the performance and continued growth of the Concord, NC manufacturing facility, in the Composites Solutions Business (CSB). Reporting to the Operations Leader, this position is accountable for functioning at high levels of effectiveness at both the "hands-on" and the strategic levels.

The Manufacturing Engineer's purpose is to assure all plant and area goals are met for safety, cost, quality, alloy, and delivery. This position will achieve these goals through effectively working in the leadership team and engaging the production team members.

This position is generally responsible for:

- Keeping safety first
- Supporting the customer (internal & external)
- Meeting critical operating targets & tasks
- Ensuring all team goals and targets are met
- Ensuring proper procedures and controls are in place

Qualifications

- BS in IE or ME
- Excellent oral and written communication skills
- Proven leadership skills
- Teamwork at all levels
- Lean Manufacturing / Six Sigma knowledge
 - High level of integrity
 - Willingness to learn and operate machines for training purposes
 - Problem resolution skills
